

## ipoque Wins IBM Bestseller Award 2009

## Press Release

**Leipzig, February 10, 2010** – ipoque, the leading European provider of Internet traffic management solutions, received the Bestseller Award in the category "Best Solutions Partner" at this year's IBM Channel Kick Off in Berlin. The company was honored for successful business in 2009 among 32 other German IBM partners.

Dr. Frank Stummer, CFO of ipoque, accepted the award: "All of us are very proud to receive this honor. We started cooperating with IBM just one year ago and it is good to see what we have achieved in such a short time."

ipoque is an IBM Solutions Partner and uses BladeCenter technology for its carrier-grade PRX-10G Traffic Manager. Since ipoque started working with IBM, the two companies cooperated in several international projects: ipoque shipped eleven PRX-10G Traffic Managers to various customers in Africa and the Middle East last December alone.

### About ipoque

ipoque is the leading European provider of deep packet inspection (DPI) solutions for Internet traffic management and analysis. ipoque's PRX Traffic Manager allows network operators and Internet service providers to effectively monitor, shape, optimize, limit and control the resource consumption of network applications on a per-subscriber basis. The integrated quality-of-service (QoS) management functionality allows prioritization and optimization of network traffic to ensure the highest subscriber satisfaction and effective protection of the operator's infrastructure at the same time. ipoque's DPI engine reliably detects all relevant protocols and applications found in today's networks, including the most difficult-to-detect and proprietary protocols such as peer-to-peer file sharing (P2P), instant messaging (IM), Voice over IP (VoIP), tunneling, video and audio streaming, as well as many legacy applications.
